These herbs are derived from plant parts such as leaves, bark, flowers, roots, fruits, and seeds. Herbal medicine is a practice that includes herbs, herbal material, and their preparations that contain parts of plants or combinations thereof as active ingredients. However, usage of traditional remedies increases when conventional medicine is ineffective in the treatment of disease, such as in advanced cancer and in the face of new infectious diseases. In some localities, medicinal plants are perceived according to their traditional uses and represent a low-cost alternative to treat various diseases. Some natural remedies may be more affordable and accessible than conventional medicines, and many people prefer using them because they align with personal health ideologies.

The recruiters shortlist candidates based on these interviews and provide us a list of candidates that they believe have a very high chance of being selected in a job interview. This independent assessment by professional recruiters is a good 'lead' indicator of employability.

9. Comments from Bajaj Finserv CPBFI Team:

What could have been better –

- The passing ratio of the batch could have been better. Many students have failed because of low attendance.
- Many students did not appear for the HR Workshop despite being regular in the classes. They would have learnt a lot from the experience.

We place on record our appreciation for the efforts put in by the coordinator Nandkishor G. Rangari, and other staff in making the batch successful. Overall, some of the students have sincerely completed the program and performed well and we are confident, every one of them has a successful career ahead!

Thank you!!

6. Overall attendance (%) = Actual Student Days / Available Student Days X 100

Example: In a CPBFI batch 43 students registered and paid fees. By end of first week 3 students stopped attending the batch. The batch was conducted for 40 days. Out of the 40 regular students – 10 attended every class, 15 attended for 35 days, 10 attended for 33 days and 5 attended by 30 days. Overall attendance will be calculated as under.

Enrollment: 43

Drop-out (Max allowed 4.3 i.e. 4): 3

Regular students: 40

Available days: 40 X 40 i.e. 1600

Actual days: (10 X 40) + (15 X 35) + (10 X 33) + (5 X 30) = 400 + 525 + 330 + 150 = 1405

Overall attendance: (1405 / 1600) X 100 = 87.81%
